

NATIONAL FLOORING
Floors For Industry

PROJECT REFERENCE

Anglia Regional Co-operative Society
Cambridgeshire

:: Installation requirements

Anglia Regional Co-operative Society was looking for a floor finish to replace the traditional terrazzo tiles that were causing major problems through cracking. Matching the original tiles also proved to be time-consuming and complicated.

The Anglian Society required a floor finish that was hardwearing, hygienic and easy to clean but also incorporated the company's corporate colours.

:: Why National Flooring?

National Flooring was able to provide the Anglian Society with a product that proposed the ideal solution to its requirements.

The refurbishment programme of 384 sq metres had to be completed within three days due to short timescales. National Flooring ensured minimal disruption by matching the client's programme and provided a product that is ready for use just two hours after installation.

The final solution provided by National Flooring ensured that the quotation agreed was the price they paid, with no hidden extra costs incurred when on site.

"We were looking for a low-maintenance, cost effective flooring solution which could be tailored to match our corporate colours. The Degaflor Flake resin flooring system provided this and it is tough and looks great."
Andrew Dighton, Anglia Regional Co-operative Society.

The National Flooring Company Ltd is an expert installer of resin flooring solutions for today's demanding industrial and commercial environments. We specialise in the installation of Degaflor MMA based resin systems and polyurethane systems. Additionally, we can also install all detailing and finishing items together with stainless steel drainage systems.
