

NATIONAL FLOORING
Floors For Industry

PROJECT REFERENCE

The Elysium Group

:: Installation requirements

National Flooring was asked by Matt Rawlinson Design Ltd to install four innovative and bespoke finishes as part of a multi-million pound refurbishment to one of London's most exclusive venues. The Penthouse Nightclub is situated at Number One Leicester Square and is a popular venue for celebrities.

The design had to reflect the venue's stylish image, therefore National Flooring specified the Degafloor Flake system. A biscuit coloured flake was installed in the restaurant and bar areas. A striking orange with silver flakes was installed on the main dance floor and a pearlescent system in the two bathrooms.

:: Why National Flooring?

National Flooring worked closely with Matt Rawlinson Design Ltd to provide a flooring solution to fit the

specification requirements. As a high profile venue the specification required an innovative and bespoke yet extremely durable floor. National Flooring specified the Degafloor Flake system, which allows an almost endless range of finishes. The finishes were chosen to reflect the stylish décor throughout different areas of the club.

The project was also on an extremely tight deadline and required a solution that could be installed rapidly with minimal disruption to the refurbishment.

Matt Rawlinson, of MRD Ltd explained "National Flooring gave us a solution which provided the best of both worlds - the practicalities of the Degafloor flooring system meant we had a new floor installed and ready for use in two hours, but also the slick, contemporary feel to the finishes meant we didn't have to compromise on style."

The National Flooring Company Ltd is an expert installer of resin flooring solutions for today's demanding industrial and commercial environments. We specialise in the installation of Degafloor MMA based resin systems and polyurethane systems. Additionally, we can also install all detailing and finishing items together with stainless steel drainage systems.
