

NATIONAL FLOORING
Floors For Industry

PROJECT REFERENCE

Leeds United FC

:: Installation requirements

Slip resistant floor surfaces are high on the list of importance in football stadiums where tens of thousands of spectators attend every week.

Leeds Utd needed to replace the existing floor surface with a slip resistant finish due to the number of accidents that had previously occurred.

:: Why National Flooring?

Celtic Park installed an allegedly non-slip floor paint which resulted in numerous accidents over a three

month period. After installing the National Flooring recommended system there have been no reported accidents for 5 years. The specifically chosen system was Degafloor FB, backed with a 7-year warranty.

The Leeds Utd Management team saw the installation and after recommendation from Celtic Park on the product and service, called upon National Flooring to deliver the same solution.

Additionally, the systems unique two hour cure time ensured that works could be easily scheduled around the busy operating cycle at Elland Road.

The National Flooring Company Ltd is an expert installer of resin flooring solutions for today's demanding industrial and commercial environments. We specialise in the installation of Degafloor MMA based resin systems and polyurethane systems. Additionally, we can also install all detailing and finishing items together with stainless steel drainage systems.
