

**NATIONAL FLOORING**  
Floors For Industry

# PROJECT REFERENCE

HMP/YOI Norwich

## :: Installation requirements

The surface needed a seamless and easy to maintain floor with a secure bond to the subfloor that could also offer a decorative finish.

## :: Why National Flooring?

It was essential that the area was not out of use for an extended amount of time, therefore the solution provided by National Flooring using the Degaflor Flake system ensured that the installation was completed efficiently and to the satisfaction of the client. After installation, the floor is totally cured within two hours allowing the area to be fully operational.

National Flooring proved their experience in this industry after completing a number of installations in similar areas at different locations including HMYOI Huntercombe, HMP Doncaster, HMP Littlehey, HMP Nottingham and HMP Gloucester.

Martin Hanson, Estates Manager at HMP Norwich said "Probably the most vital factor is time. If something is likely to take longer than a few days then we can't do it, so the faster a floor can be down and ready to use, the better. National Flooring did everything they claimed in their specification and service."

The National Flooring Company Ltd is an expert installer of resin flooring solutions for today's demanding industrial and commercial environments. We specialise in the installation of Degaflor MMA based resin systems and polyurethane systems. Additionally, we can also install all detailing and finishing items together with stainless steel drainage systems.
