Simply Fresh Foods Lincolnshire

:: Installation requirements

Simply Fresh Foods in Worsley had increasing concerns over the slip resistance of floors in critical parts within their processing areas. Given the almost 24/7 operating cycle in place at Simply Fresh, they needed a very fast curing solution to ensure that valuable production time did not have to be sacrificed.

:: Why National Flooring?

Following a site survey National Flooring specified a Degafloor FB system, which cures fully two hours after installation. National Flooring was able to prepare and install the floor during extremely short 'out of production' periods. Two hours after installation the areas were put back into full production ensuring valuable time was not lost.

Some of the production processes, which include oil and water, mean that adequate slip resistance is required. The Degafloor FB system offers outstanding slip resistance under both wet and oily conditions ensuring that safety of employers is maintained.

Alistair Clark, Engineering Manager at Simply Fresh Foods, 'The choice was simple, in the past it has taken days or even weeks to get a new floor laid yet National Flooring was able to specify a solution that that was installed quickly and ready for full use just hours after the work was completed.'
