## St Guthlac School

### :: Installation requirements

St Guthlac School in Peterborough required a floor finish that would stand up to the environment of a primary school. The floor needed to be durable and easy to clean.

### :: Why National Flooring?

Following a successful installation at the George Farmer School in Holbeach, the Headmaster to both schools called in National Flooring to refurbish the primary school using the same system.

The existing floor was a mixture of worn vinyl sheet and carpet tiles, which were in need of replacing. The Degafloor Decorative Flake system was chosen to provide an attractive yet hardwearing solution. The system installed at 4mm offers outstanding durability and due to its bonding characteristics the seamless system does not exhibit weakness, unlike vinyl where seams become damaged and worn. The system is also exceptionally easy to clean unlike carpet tiles, which stain and wear easily.

National Flooring having already proved their practical and technical abilities at the previous school, installed the Degafloor Flake system with minimal disruption leaving members of staff delighted with the transformed floor.

Sheila Page, Deputy Head, commented, " We are extremely pleased with the floor and the effort put in by National Flooring. The standard of the service we received was exceptional."
