## Student Union Nightclub

Birmingham University

### :: Installation requirements

As a part of a refurbishment to the Guild of Students Union Building the University was looking for a stylish and durable floor finish that could be installed with minimal disruption.

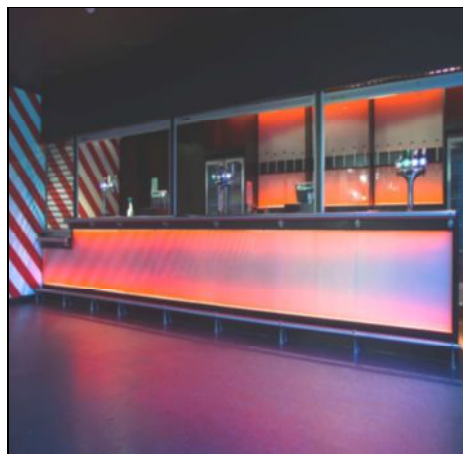

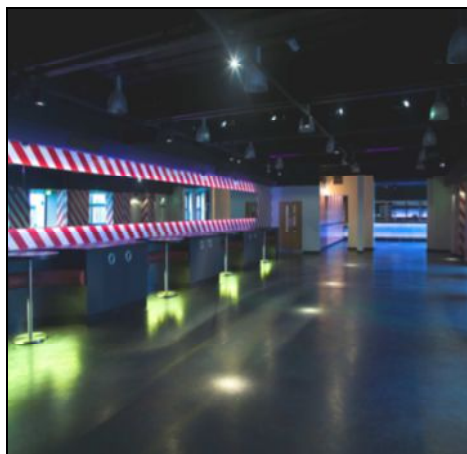

### :: Why National Flooring?

As a part of the upgrade to the student services, The University of Birmingham Guild of Students Building, the recognised main student union for over 27,000 students in the city, has seen some radical developments. As a part of these new developments it was decided to completely refurbish the popular nightclub 'The Underground'.

The existing floor finish had become well worn and the Guild decided it was time to give the venue a new and stylish revamp. The Guild of Students appointed student union experts, Plumtree Mee to develop a fresh and innovative new look for the club, As a part of the design theme the Degafloor QT system was chosen with a black and silver finish to complement the clubs stylish and glamorous image.

To minimise the operational impact to the Guild the full refurbishment had to occur during the summer period. The installation, which totalled 361sqm, was completed efficiently within three days. National Flooring's expertise combined with Degafloor's unique 2 hour cure time meant the installation could be completed with minimal disruption to other trades and allowed the remainder of the refurbishment to continue shortly after.

Rob Matthews of Plumtree Mee comments, "We chose the Degafloor QT System for its resilient technical specification, minimal on-going maintenance requirement and design flexibility. This type of flooring provides outstanding durability, so I am confident that The Underground will enjoy many years of successful trading before needing the next refurbishment."
