

Project Reference

Center Parcs

:: Installation requirements

To provide a seamless, hardwearing floor surface that remained hygienic and easy to maintain. The floor finish also had to reflect corporate colours.

A flooring system that was capable of being installed over a mixture of sub floors (concrete, tiles and marine ply). The flooring solution also had to be completed within a short programme to allow continual trading.

:: Why National Flooring?

Center Parcs was faced with the problem of over coating three different floor finishes, concrete, tiles and marine ply. National Flooring's expertise combined with Degafloor's flooring solutions ensured that an ideal proposition was achieved. A seamless and attractive, yet durable floor, was installed with minimal disruption to both the business and guests at the facility.

The Degafloor Flake system also provided bespoke aesthetics that create a completely seamless floor offering many advantages over traditional finishes.

Stephen Gormley, Project Manager at Center Parcs commented, "Degafloor's properties immediately stood out to us, especially its rapid cure time. National Flooring carried out an efficient installation in a professional manner that minimised impact on the guests and the operation of the outlet."
