Floors For Industry

:: Installation requirements

Having invested in the new state of the art Walkers Stadium, Leicester City FC wanted to ensure the safety of supporters by making the concourse areas slip resistant.

:: Why National Flooring?

The existing power floated concrete was causing concern to the club as the finish was becoming very slippery and the risk of potential accidents on match days was increasing. To resolve these concerns National Flooring was appointed and specified the slip resistant Degafloor FB system, as previously used and recommended by Celtic park and Leeds Utd. The system was installed in blue and white to match team colours.

Impressed with the service received and suitability of the product the club invited National Flooring back to complete a further installation.

David Butcher, Head of Internal Services at the club said, "Feedback from the Directors and Senior Management teams has been very favourable and we expect these works to provide a significant improvement in spectator safety."
